

Password Strength Report

Score: 11/14 checks passed

Our evaluation: Reasonable!

Check Results

 PASS

Length

Password length is 15 characters, which meets the strong password threshold.

 PASS

Uppercase

Password contains at least one uppercase letter.

 PASS

Lowercase

Password contains at least one lowercase letter.

 PASS

Digits

Password contains at least one digit.

 PASS

Special chars

Password contains at least one special character.

 FAIL

Weak substitutions

Password is based on a commonly known word disguised with character substitutions: 'password'.

 PASS

Repeated chars

Password does not contain any repeated character sequences.

 PASS

Sequential pattern

Password does not contain any sequential patterns.

**FAIL****Year pattern**

Password contains a year pattern (e.g. 1990, 2024), which is a commonly used and predictable addition.

**PASS****Entropy**

Password entropy is 78.32 bits (Strong) after a 20-bit penalty for predictable character substitutions.

**PASS****Crack time (online)**

Estimated crack time under an online attack (1,000 guesses/second, rate-limited): centuries.

**PASS****Crack time (offline slow hash)**

Estimated crack time against a slow hash (bcrypt/Argon2 at 10,000,000 guesses/second): centuries.

**PASS****Crack time (offline fast hash)**

Estimated crack time against a fast hash (MD5/SHA-1 on NVIDIA RTX 3090 at 22,000,000,000 guesses/second): centuries.

**FAIL****HIBP**

Password has been found in 59 known data breach records.

Recommendations

1. This password has been exposed in a known data breach. Choose a completely different password immediately.
2. Avoid using common words with character substitutions such as '@' for 'a' or '0' for 'o'.
3. Avoid appending years to your password (e.g. 1990, 2024).
